EDUCATION

SRKR Engineering College, Bhimavaram

July 2025 - Present

Bachelor of Technology

Computer Science and Design (CSD)

CGPA: 8.5

Sri Chaitanya College

Jul 2022 - Mar 2024

Intermediate (MPC)

Score: 904/1000

ZPHS Vanapalli

till March 2022

SSC (Class X)

Score: 510/600

CAREER OBJECTIVE

Computer Science undergraduate seeking a Software Development Engineer (SDE) role to build scalable, real-world applications while applying and expanding my skills in full-stack development and AI-driven systems.

EXPERIENCE

Pynyx Private Limited

July 2026 – Present

Software Development Engineer (SDE) Intern

- Developed full-stack applications across 2 core layers – frontend & backend – integrating REST APIs, databases, and third-party services.
- Built AI-powered features using LLMs and AI APIs, contributing to Agentic AI and intelligent automation initiatives.
- Tested, debugged, and optimized applications across 3 key areas: performance, scalability, and reliability.
- Collaborated with engineering teams and documented 5+ technical workflows and implementation insights.

PROJECTS

MediVault

Udhbhav 2k26 Hackathon

Live Demo: medivault-zeta-seven.vercel.app

Patient-owned digital health records platform enabling secure, portable medical data access across providers.

- Built with React, Node.js, PostgreSQL, Appwrite, and GPT-4o across a 3-tier architecture (frontend, backend, database).
- Designed a patient-owned data model giving users full control over 100% of their medical records, removing single-provider lock-in.
- Integrated GPT-4o to auto-summarize medical history, cutting manual record review effort for clinicians.
- Competed against 50+ teams and placed 2nd overall at Udhbhav 2k26.

Blood Link

Hackoverflow 2k25 Hackathon

Live Demo: blood-link-alpha.vercel.app

Real-time blood donation and management system connecting donors, recipients, and blood banks.

- Built as part of a 4-member team, "Code Avengers", delivering a working prototype within a 24-hour hackathon window.

- Designed a real-time matching system to connect donors with recipients based on blood group and location.
- Implemented a centralized dashboard tracking blood bank inventory across multiple donation centers.

TECHNICAL STRENGTHS

Programming Languages	C, Java, Python
Web Technologies	HTML, CSS, JavaScript, Node.js, Next.js, Nest.js, React, TypeScript
Tools	Vercel, Supabase, Neon, Appwrite, Git, GitHub, VS Code, Cursor
Databases	PostgreSQL, MySQL

CODING PLATFORMS

LeetCode	leetcode.com/u/aharonkosetti
-----------------	---

ACHIEVEMENTS

- 2nd Place - Udhbhav 2k26 Hackathon, for MediVault *3rd March 2026*
